This Proposal is for adding a 40kw LP generator to an existing lift station for the city of Leeds, ND:

- Wire per local and national electrical codes
- Provide and install 40KW generator and ATS
- No location given for generator, so location figured to be withing 12 feet of lift station control panel
- Provide concrete pad and wiring between Control Panel-ATS-Generator
- Propane tank and piping to be provided by others
- Factory start-up and training provided by generator supplier
- Material – Labor – Permit included

Total

\$59,695.00

There will be additional costs for any change orders during work progress. Progress payments are due when work on-site begins.

Sincerely,

Joshua Boling
